OBJECTIVEC

```
#include <iostream>
#include <sstream>
#include <string>

int main()
{
    int age = 0;
    bool voter = false;
    char null = '\0';

    while (!voter)
    {
        std::cout << "Enter Your Age: ";

        std::string obj;
        getline(std::cin, obj);

        std::stringstream sobj(obj);
        if (!(sobj >> age) || (sobj >> std::ws && sobj.get(null)) || age <= 17 || age <= 0)
            std::cout << " You are not eligible for voting, grow up eventually you day will come." << std::endl;
        else
            voter = true ;
    }
    std::cout << "You are " << age << " Years old, go ahead and vote." << std::endl;

    return 0;
}
```
